RE: Peace Airshed Zone Association (PASZA) 2005 Annual Ambient Air Monitoring Report

On behalf of the Peace Airshed Zone Association (PASZA), we are pleased to present the 2005 Ambient Air Monitoring Network Annual Report.

The PASZA network consists of four continuous air monitoring stations (Henry Pirker, Evergreen Park, Smokey Heights and Beaverlodge) with the addition of forty-three passive monitoring stations (refer to Figure 1).

Additional information about PASZA, including its membership, objectives and details on the monitoring network are included on the web at <http://www.pasza.ca/>.

The continuous air monitoring stations measured the following parameters in 2005:

Parameter:	Station(s):
Sulphur Dioxide (SO₂)	Henry Pirker, Evergreen Park Smokey Heights, Beaverlodge
Nitrogen Dioxide (NO₂ , NO, NO _x)	Henry Pirker, Beaverlodge
Ozone (O₃)	Henry Pirker, Beaverlodge
Carbon Monoxide (CO)	Henry Pirker
Total Hydrocarbons (THC)	Henry Pirker
Total Reduced Sulphur (TRS)	Henry Pirker, Evergreen Smokey Heights
Particulate Matter (PM_{2.5})	Henry Pirker, Evergreen Park Smokey Heights, Beaverlodge
Wind Speed & Wind Direction (WS & WD)	Henry Pirker, Evergreen Park Smokey Heights, Beaverlodge
Relative Humidity (RH)	Henry Pirker, Beaverlodge
Solar Radiation (SR)	Henry Pirker

Temperature (Temp)	Henry Pirker, Evergreen Park Smokey Heights, Beaverlodge
-----------------------------	---

There were three (3) 1-hr averages of Total Reduced Sulphur (TRS) above the Hydrogen Sulphide Objective (AAAQO of 10 ppb) all of which were recorded at the Smokey Heights station:

- AENV Reference #164589 – October 8, 2005 for two hours (2:00 to 4:00) at Smokey Heights
- AENV Reference #166163 – December 6, 2005 for one hour (12:00 to 1:00) at Smokey Heights

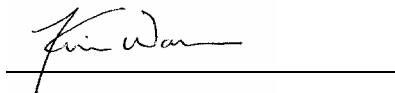

There were no 24-hr or annual averages of sulphur dioxide, nitrogen dioxide, ozone, carbon monoxide, total reduced sulphur or particulate matter (PM_{2.5}) above the Alberta Ambient Air Quality Objectives during 2005.

The passive monitoring network consists of 43 samplers distributed throughout the PASZA zone (B.C. border to Slave Lake extending from Peace County to South of Valleyview - Figure 1). The parameters measured at each site are sulphur dioxide (SO₂), nitrogen dioxide (NO₂) and ozone (O₃). There were no annual averages of the sulphur dioxide or nitrogen dioxide above the Alberta Ambient Air Quality Objectives.

We trust that the report satisfies your requirements and if you have any questions or concerns please call the undersigned at (403)-238-6640

Sincerely,

Peace Air Shed Zone Association

Kevin Warren,
Executive Director, PASZA

Encl.
