Re: Peace Airshed Zone Association (PASZA) – April Ambient Air Report

Enclosed is the PASZA Ambient Monitoring Network Report for the month of **April 2005**.

Continuous Monitoring: **3 Stations including Henry Pirker (Grande Prairie), Evergreen Park and Smoky Heights**

Included in this report is a summary of the monthly continuous monitoring, detailed hourly average reports and multipoint calibration reports of all instruments. Operational summaries can be found on the "Monthly Summary" and "Continuous Monitoring" pages of the report. The measured ambient air quality was within the Provincial and Federal guidelines with no exceedences recorded.

During the month of April the operational time for the TRS parameter at the Henry Pirker station fell to 84% (AENV reference number 157963). The follow up letter sent to AENV is attached, which provides an explanation of the incident.

Passive Monitoring: **43 Stations throughout the PASZA zone:**

There were no missing passives during the month of April. A summary of the passive data collected are reported as follows.

- Monthly average concentrations for SO₂ passives ranged from 0.1 ppb to 0.4 ppb.
- Monthly average concentrations for NO₂ passives ranged from 0.4 ppb to 8.8 ppb.
- Monthly average concentrations for O₃ passives ranged from 27.3 ppb to 52.1 ppb.

If you have any questions, please contact the Focus office at 1-888-869-2252 (Gary Cross) or 1-888-466-6555 (Kevin McCullum).

On Behalf of the,
Peace Airshed Zone Association

Kevin Warren
PASZA Technical Program Manager

Kevin McCullum, Ph.D., P.Eng.
AQM Environmental Engineer

Edmonton, Alberta T5K 2J6

ATTENTION: Director

RE: Air Monitoring Directive Contravention Report Ref # 157963

A contravention of the Alberta Air Monitoring Directive was recently reported by Focus to Alberta Environment (AENV) on behalf of the Peace Airshed Zone Association (PASZA). The contravention was less than ninety (90%) percent data collection for the month of April 2005 for the TRS analyzer at the Henry Pirker Air Monitoring Station located in Grande Prairie, Alberta. The station is owned by PASZA and operated on their behalf by Focus. The contravention has been assigned AENV reference number 157963.

The cause of the contravention was due to a power failure that occurred at the station on April 8, 2005 at 16:00. The power failure resulted in the failure of the TRS converter thermocouple causing the converter temperature to remain at room temperature. The following action was taken:

- On April 9, 2005 an alarm was received that the TRS span was well below the limits for the analyzer.
- On April 11, 2005 a technician was dispatched to the site to investigate the problem. It was discovered that the thermocouple had failed.
- On April 12, 2005 the spare converter was attempted to be installed, but could not function as the quartz tube had been broken in transit. A new thermocouple was couriered to the Grande Prairie office immediately.
- On April 13, 2005 the new thermocouple was received, installed and the analyzer was calibrated and made operational.

Spare thermocouples have been ordered and will be kept at the station in the event of a similar failure in the future.

If there are any questions or concerns please call me at your convenience.

Sincerely,

THE FOCUS CORPORATION

Gary Cross,
AQMP Technical Manager

Continuous Monitoring

Ambient Air Monitoring Network

PASZA – Henry Pirker Station

General Station Issues

A power failure on April 8 (16:00 to 18:00) resulted in loss of data for all instruments. In addition the power failure caused the TRS analyzer to fail, resulting in less than 90% uptime on this instrument (Ref#157963).

Parameter	Make	Model	Notes
SO ₂	TECO	43	2-hrs of data loss due to power failure
NOx/NO/NO ₂	TECO	42	3-hrs of data loss due to power failure
O ₃	API	400	2-hrs of data loss due to power failure
CO	TECO	48	2-hrs of data loss due to power failure
THC	TEI	51-CLT	3-hrs of data loss due to power failure
TRS	TEI	42C	3-hrs of data loss due to power failure; 111-hours of instrument out of service due to power failure; 2-hrs of excessive drifting; and 1-hr of maintenance
PM _{2.5}	R&P	1400AB	3-hrs of data loss due to power failure
RH	Met One	083D	2-hrs of data loss due to power failure
AT	Met One	083D	2-hrs of data loss due to power failure
SR	Met One	096-1	2-hrs of data loss due to power failure
WS	Met One	010C	2-hrs of data loss due to power failure
WD	Met One	020C	2-hrs of data loss due to power failure

PASZA – Evergreen Park Station

General Station Issues

There were no general operational issues noted during the month

Parameter	Make	Model	Notes
SO ₂	TECO	43	No operational problems observed
TRS	TEI	42C	No operational problems observed
PM _{2.5}	R&P	1400AB	10-hours of data was removed due to excessive drift; 1-hour of data was lost due to communications failure with TEOM
AT	Met One	062-1	No operational problems observed
WS	Met One	010C	No operational problems observed
WD	Met One	020C	No operational problems observed

PASZA – Smoky Heights Station

General Station Issues

There were no general operational issues noted during the month

Parameter	Make	Model	Notes
SO ₂	TECO	43	No operational problems observed
TRS	TEI	42C	No operational problems observed
PM _{2.5}	R&P	1400AB	5-hours of data was removed due to excessive drift
AT	Met One	062-1	No operational problems observed
WS	Met One	010C	No operational problems observed
WD	Met One	020C	No operational problems observed

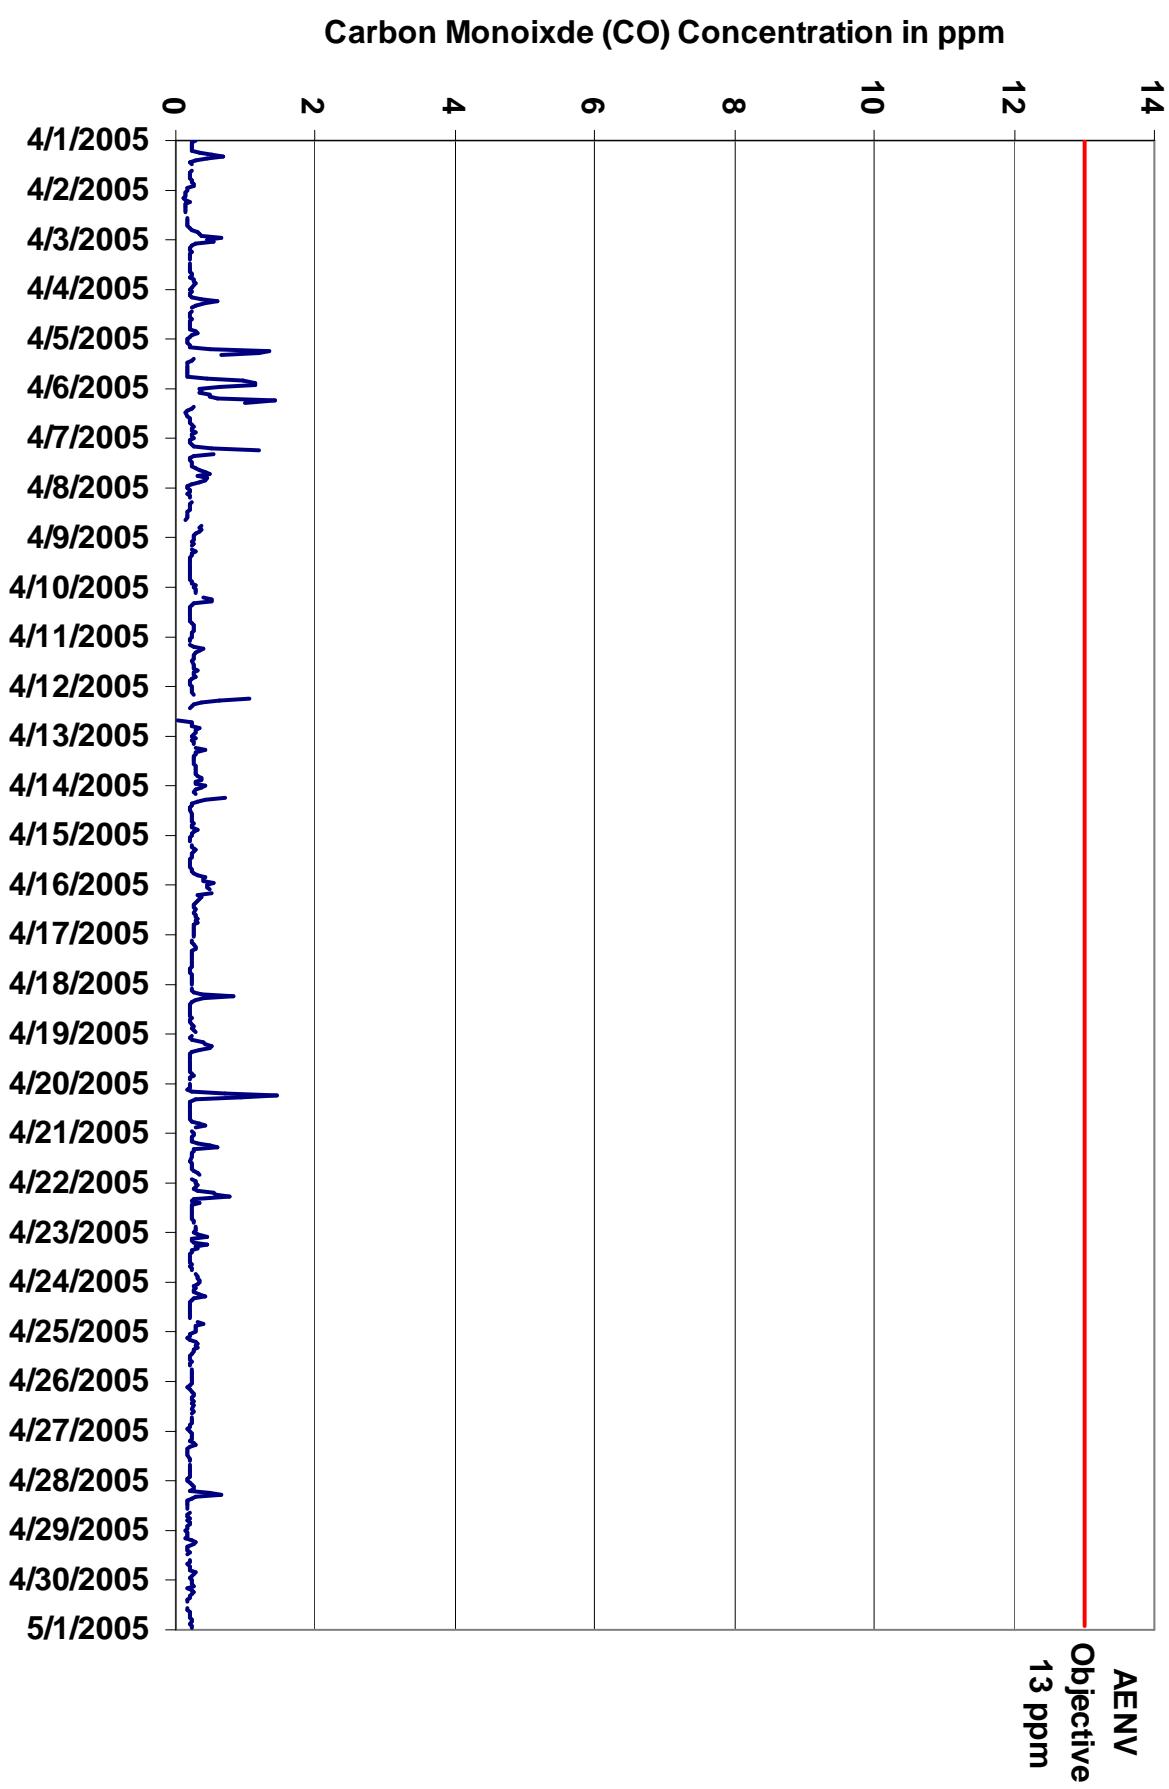

Figure 9. PASZA - Henry Pirker Carbon Monoxide 1-hr Average Monthly Trend

Station: Henry Pirker
 Station Owner: PASZA

Monitoring Dates: April 1, 2005 to May 1, 2005

HOURLY MAXIMUM TABLE

Carbon Monoxide (CO)

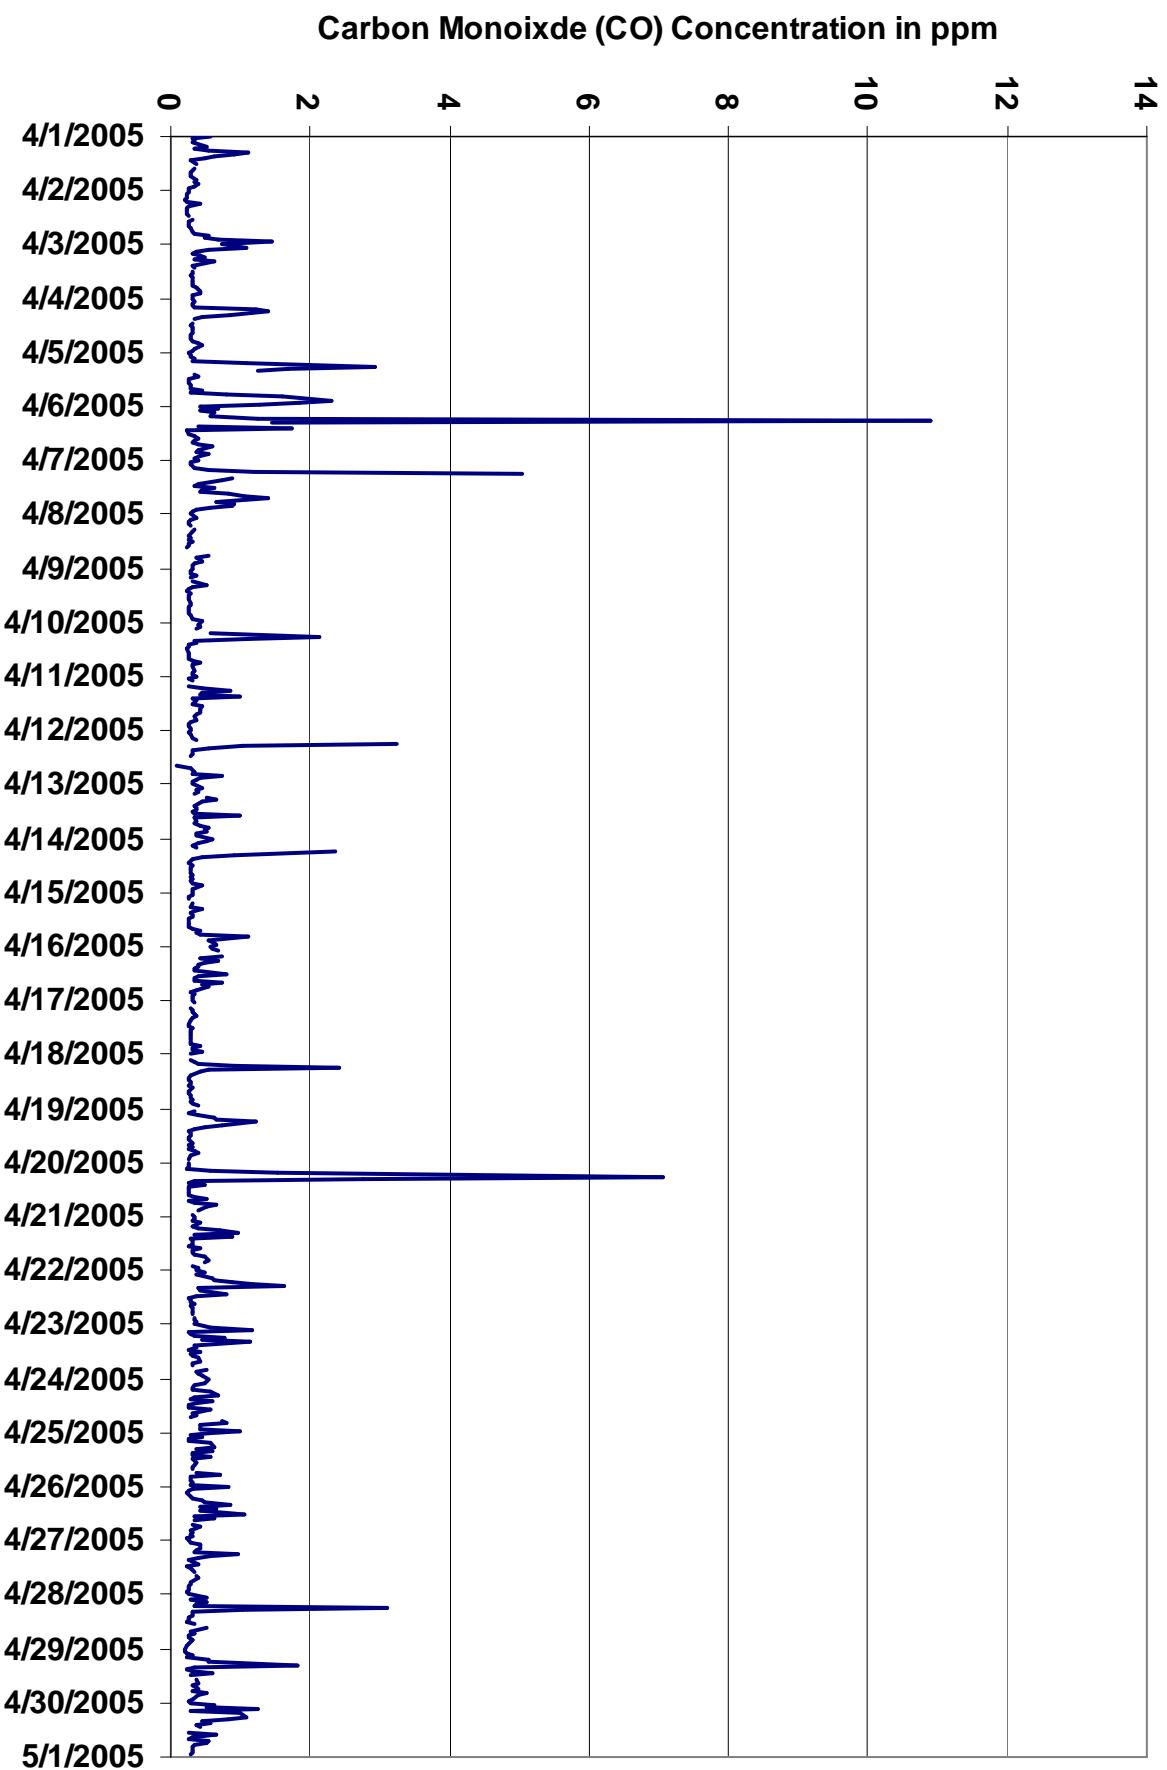

Summary

Maximum 1-hr Value:	10.9	ppm	6-Apr	6:00 7:00
Maximum 24-hr Value:	1.0	ppm	6-Apr	

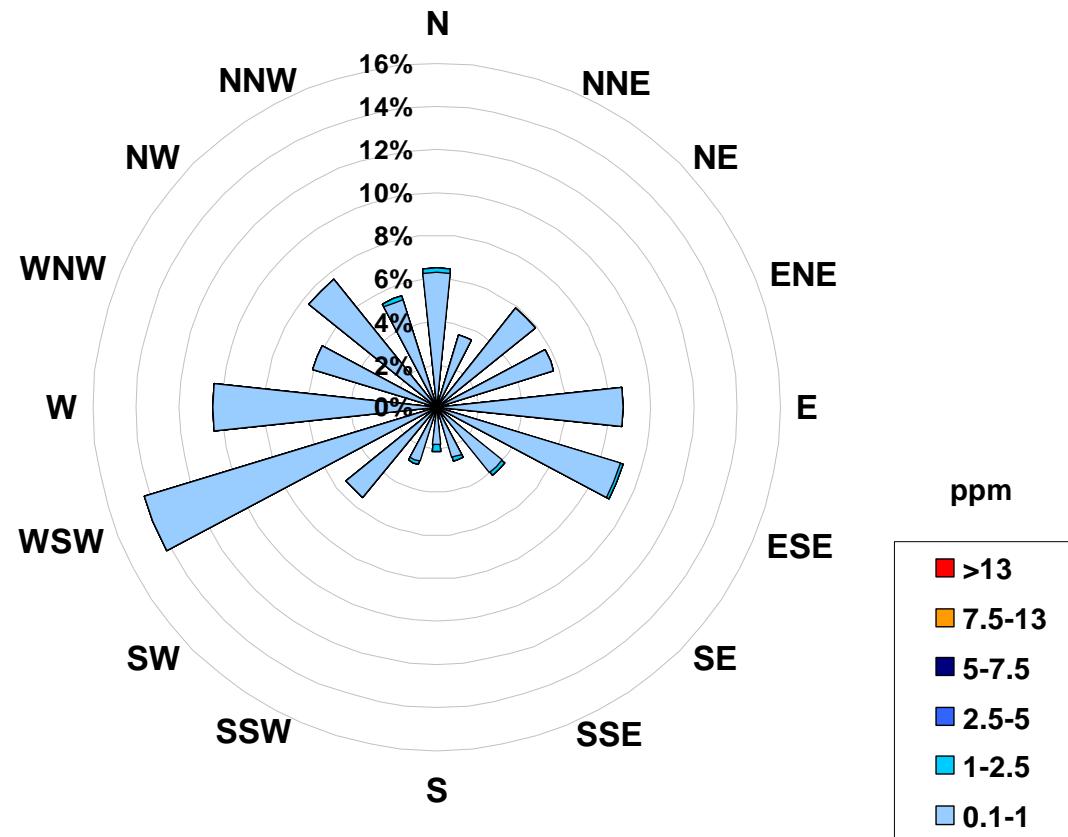

AIC Time:	33 hrs	Operational Time:	683 hrs												
Calibration Time:	2 hrs	AMD Operational Uptime:	99.7%												
Percentile			Average												
99	95	75	50	25	5	1	2.5	1.1	0.5	0.3	0.3	0.2	0.2	0.5	ppm
